EVDC Guidance Document

EVDC EXAM : LIST of STANDARD PRACTICAL PROCEDURES (LSPP) Small Companion Animals (Dog, Cat, Rabbit)

Document version : evdc-guide-Exam_Practical_Procedures_Small_Animal-20110529.doc

European Veterinary Dental College

EVDC EXAM :

LIST of STANDARD PRACTICAL PROCEDURES (LSPP)

Small Companion Animals (Dog, Cat, Rabbit)

The latest version of this document is available from the College web site : <http://www.evdc.info/>

This document provides a list of standard procedures that can be expected in the EVDC Practical Exam. It is provided to guide exam candidates in preparing for the exam. Candidates should ensure that they have all the materials, instruments and equipment necessary to perform any of these procedures with them when they attend the practical examination.

PERIODONTICS (PE)

<i>i/d</i>	<i>Procedure Outline</i>	<i>Species</i>	<i>Teeth</i>
1	Dental scaling and polishing on an assigned area.	D, C	Any
2	Gingivectomy (of X mm) on an assigned area.	D	Any (canine)
3	Gingival or mucogingival access flap to enable open subgingival debridement.	D	Any
4	Apically positioned flap of X mm on an assigned area.	D	Incisors, canine
5	Root coverage procedure on an assigned defect area (e.g., laterally repositioned flaps, coronally advanced flap, free gingival grafts, subepithelial connective tissue grafts)	D	Canine, carnassial
6	Guided tissue regeneration (guided bone regeneration) technique for management of a periodontal defect.	D	
7	Crown lengthening procedure (gingivectomy, internal bevel and/or apically positioned flap).	D	Canine
8	Infra-bony pocket surgical treatment	D	Canine (palatal side)

Endodontics (EN)

<i>i/d</i>	<i>Procedure Outline</i>	<i>Species</i>	<i>Teeth</i>
1	Crown amputation and partial coronal pulpectomy (vital pulpotomy), specific tooth as directed.	D	Canine
2	Pulpectomy (standard root canal treatment) + GP obturation technique on single-rooted teeth	D,C	Canine, incisors
3	Pulpectomy (standard root canal treatment) + GP obturation technique on two- or three-rooted teeth	D	M1, P4
4	Endodontic surgery (apicectomy +/- retrograde filling)	D	Canine, P4, M1

Restorative (RE)

<i>i/d</i>	<i>Procedure Outline</i>	<i>Species</i>	<i>Teeth</i>
1	Shallow to moderate carious lesion preparation and filling - thick dentine over pulp	D	Max M1, Mand M1
2	Deep carious lesion preparation and pulpal protection (no filling) – defect near-pulpal exposure on occlusal surface	D	Max M1, Mand M1
3	Cavity preparation on a pulpless tooth with root canal filling	D	C, M1, P4
4	Aesthetic composite restoration of a crown tooth surface defect (i.e. enamel hypoplasia) on incisor or canine tooth.	D	Canine, Incisor
5	Crown wall restoration close to gingival margin	D	Canine, M1

Prosthodontics (PR)

<i>i/d</i>	<i>Procedure Outline</i>	<i>Species</i>	<i>Teeth</i>
1	Full cast crown preparation supragingival margin + impression	D	Canine, Max P4, Mand M1
2	Full cast crown preparation subgingival margin + impression	D	Canine
3	Aesthetic direct crown build-up on a fractured tooth	D	Incisor
4	Three-quarter crown preparation + impression	D	Canine

Oral Surgery (OS)

<i>i/d</i>	<i>Procedure Outline</i>	<i>Species</i>	<i>Teeth</i>
1	Closed extraction technique of single-rooted teeth	D,C	Incisors
2	Open extraction technique of single-rooted teeth	D,C	Any
3	Open extraction technique of multirooted teeth	D,C	Any
4	Hemisection and root extraction (root separation and resection) on a carnassial tooth	D	P4, M1
5	Full quadrant extraction in a cat.	C	All
6	Extraction of root tips in a cat or in dogs	D,C	Any
7	Intentional root retention of a specific tooth, cat.	C	Any
8	Repair of oronasal fistula of dental origin : mucosal advancement or transposition flap	D,C	Any
9	Sagittal midline rostral defect of the hard palate: repair with an appropriate palatoplasty	D, C	caudal
10	Sagittal midline caudal defect of the hard palate: repair with an appropriate palatoplasty	D, C	midline
11	Parasagittal caudal defect of the hard palate: repair with an appropriate palatoplasty	D, C	midline
12	Parasagittal rostral defect of the hard palate: repair with an appropriate palatoplasty	D, C	midline
13	Soft palate cleft repair	D, C	midline
14	TMJ condylectomy	C	R, L
15	Zygomatic arch resection	D,C	R, L
16	Coronoid process resection	D	R, L
17	Maxillo-mandibular fixation	C	4 canines
18	Mandibular interdental fixation	D,C	Fract P3/P4 or P4/M1
19	Maxillary interdental fixation	D	Fract P3/P4
20	Unilateral rostral mandibulectomy (level P2)	D,C	up P2 incl.
21	Bilateral rostral mandibulectomy (level P2)	D,C	up P2 incl.
22	Unilateral rostral maxillectomy	D, C	up P2 incl.
23	Partial maxillectomy	D,C	centered P2
24	Mandibular rim excision	D	centered P3
25	Segmental mandibulectomy	D	centered P3 or body

26	Mandibular ramus resection	D	
27	Partial glossectomy (rostral)	D,C	rostral 1/3
28	Partial glossectomy (lateral)	D	1/3
29	Mandibular lymph nodes excision	D,C	
30	Medial retropharyngeal lymph nodes excision	D	
31	Mandibular/sublingual Salivary gland excision	DC	

Orthodontics (OR)

<i>i/d</i>	<i>Procedure Outline</i>	<i>Species</i>	<i>Teeth</i>
1	Impression(s) and bite registration(s) of a specified area, using appropriate materials.	D,C	Any
2	Cementation of brackets and buttons.	D,C	Canine, PM, M
3	Application of a bracket, button, appliance, wire, elastics, or power chain as specified	D,C	Canine, PM, M
4	Correction of rostroversion of maxillary canine tooth with orthodontic elastics or power chain	D	Canine
5	Custom-made inclined plane on maxillary canine teeth to correct linguoclusion of mandibular canine teeth	D	Canine

Radiography (RX)

1	Radiographic exam of a tooth(teeth), a specific area (e.g. a few teeth, or an entire quadrant)	D,C	Any
