

The University of Edinburgh

Royal (Dick) School of Veterinary Studies

Senior Clinical Training Scholarship (Residency) in Equine Dentistry

Further Particulars

The University of Edinburgh (<http://www.ed.ac.uk>)

For more than four centuries, our people and their achievements have rewritten history time and again. They've explored space, revolutionised surgery, published era-defining books, paved the way for life-saving medical breakthroughs and introduced to the world many inventions, discoveries and ideas from penicillin to Dolly the sheep. We have believed that anything is possible.

We still do. The latest Research Excellence Framework highlighted our place at the forefront of international research. This adds to our international reputation for the quality of our teaching and our student experience excellence.

You will be part of one of the world's leading universities, with 22 Schools spread over 3 Colleges that offer more than 500 undergraduate and 160 postgraduate courses to over 35,000 students each year. Professional services are critical to this success as well as our world-class teaching, research and student facilities. In fact, we are one of the top employers in Edinburgh, with over 12,000 people spread across a wide range of academic and supporting roles.

The University is proud of its success with online teaching initiatives, with 1905 students currently studying its online distance learning postgraduate programmes, and a total to date of 1 million enrolments for Edinburgh MOOCs.

As a world-changing, world-leading university we are an exciting, positive, creative, challenging and rewarding place to work. We give you support, nurture your talent, develop and reward success and integrate academic, professional and personal career goals, as well as give your career the benefit of a great and distinguished reputation.

The University of Edinburgh holds a Bronze Athena SWAN award in recognition of our commitment to advance the representation of women in science, mathematics, engineering and technology. We are also Stonewall Scotland Diversity Champions actively promoting LGBT equality.

The University has a range of initiatives to support a family friendly working environment. Please see <http://www.ed.ac.uk/equality-diversity/help-advice/family-friendly>

The College of Medicine and Veterinary Medicine (<http://www.ed.ac.uk/medicine-vet-medicine>)

The College of Medicine and Veterinary Medicine traces its origins back nearly 500 years (Darwin, Simpson and Conan-Doyle were students here) and is internationally renowned for its research and teaching. Headed by Professor Sir John Savill, the only conjoint Medical and Veterinary Medical School in the UK employs over 2300 academic and support staff within the College and the four Schools; Biomedical Sciences ; Molecular, Genetic and Population Health Sciences; Clinical Sciences and Royal (Dick) School of Veterinary Studies.

<http://www.ed.ac.uk/schools-departments/medicine-vet-medicine/about/medical-schools/biomedical>

<http://www.ed.ac.uk/schools-departments/medicine-vet-medicine/about/medical-schools/molecular-clinical-med>

<http://www.ed.ac.uk/schools-departments/medicine-vet-medicine/about/medical-schools/clinical-sciences>

<http://www.ed.ac.uk/schools-departments/medicine-vet-medicine/about/medical-schools/vet-school>

The undergraduate medicine teaching programme in the College enjoys a high reputation nationally and internationally, with over 1,300 students enrolled on the MBChB and Intercalated courses and nearly 1000 on the Veterinary Sciences BVS and related programmes. In addition, approximately 2000 students are currently enrolled in the College's taught and research post-graduate courses, including an extensive range of online distance learning diplomas and degrees. They are trained by over 1000 outstanding academic staff. Details of PhDs, research programmes and studentships are available through our interdisciplinary research institutes and centres (<http://www.ed.ac.uk/schools-departments/medicine-vet-medicine/research/institutes/centres>).

The academic disciplines within Medicine are largely concentrated in the two teaching hospital campuses, the Royal Infirmary at Little France and the Western General Hospital. Both have extensive new infrastructure with major research institutes and state of the art research facilities on clinical sites. Edinburgh hosts a number of prestigious MRC and BHF Research Centres. The approach is interdisciplinary, with basic and clinical researchers working together at the laboratory bench and in our clinical research facilities to address major themes in basic, clinical and translational medicine.

The Royal (Dick) School of Veterinary Science on the Easter Bush campus houses outstanding teaching and clinical facilities as well as the splendid Roslin Institute, one of the world's leading veterinary research centres. The College offers outstanding opportunities to address 'One Health' and Global Health problems of the highest international priority.

Research Excellence Framework (REF) 2014

The College's reputation as one of the world's leading centres of medical and veterinary medical research has been reaffirmed by its UK REF2014 results. Medicine, the University's largest submission, was ranked in the top 5 in the UK. Veterinary Medicine came 1st in the UK, and retained its position as the UK's top Vet School. It made a joint submission with Scotland's Rural College (SRUC). Neuroscience was ranked 3rd in the UK out of 82 submissions, representing a major advance. Overall, 84% of the College's research activity was rated world leading or internationally excellent (3* and 4*). In terms of 'one medicine' research (human and animal medicine), the University of Edinburgh's research power (quality x volume) is the strongest in the UK.

The Royal (Dick) School of Veterinary Studies (R(D)SVS) (<http://www.vet.ed.ac.uk>)

The Royal (Dick) School of Veterinary Studies, headed by Professor David Argyle, has an international reputation for its research, teaching and clinical services. It occupies a new £45 million veterinary teaching building, next to the existing prestigious small and large animal hospitals at the Easter Bush Campus, completed in 2011, and designed to support top class veterinary education in the 21st century. The hospital includes a major new veterinary oncology and imaging centre.

The School is consistently highly ranked by The Times Higher and the Guardian newspaper. The School is accredited by the Royal College of Veterinary Surgeons (RCVS), the European Association of Establishments for Veterinary Education (EAEVE) and the American Veterinary Medical Association (AVMA) and participates in the Veterinary Medical Colleges Admissions Service (VMCAS).

The School, along with The Roslin Institute and Scotland's Rural College, were part of a joint submission to the 2014 Research Excellence Framework. This submission to Unit of Assessment 6 (Agriculture, Veterinary and Food Science) was ranked as number 1 in the UK. The joint submission was the largest to UoA6, with over three quarters of the research outputs submitted judged to be "world leading" or "internationally excellent". Over 80% of the submitted impact studies were scored highly, in addition to which the research environment was scored as 100% at 4*. The REF results saw the School maintain its position as the number 1 ranked vet school for research in the UK.

The School is a global education provider and has nearly 1000 undergraduate, postgraduate and research students from a number of different countries. We provide world-class education to improve the health of animals and human beings alike and are leaders in veterinary education, research, and clinical practice, at both undergraduate and postgraduate level.

The Royal (Dick) School of Veterinary Studies holds a Bronze Athena SWAN award in recognition of our commitment to advance the representation of women in science, mathematics, engineering and technology.

In April 2008 the Easter Bush Research Consortium (EBRC) was formed which brings together the science of The Roslin Institute, the R(D)SVS, Scotland's Rural College and the Moredun Research Institute. The partnerships within the EBRC, and integration with clinical practice and education in the R(D)SVS, provide major opportunities for application and exploitation of the research of the consortium partners. Together, the EBRC forms one of the largest groups focussed on the biology of companion and production animals in the world. It undertakes basic and translational science to tackle pressing issues in animal genetics and genomics, development, health and welfare and their implications for human health.

The Roslin Institute (<http://www.roslin.ed.ac.uk>)

The internationally-renowned Roslin Institute is incorporated and co-located with Royal (Dick) School of Veterinary Studies on the Easter Bush campus. The University of Edinburgh and the Biotechnology and Biological Sciences Research Council (BBSRC) together funded a new £60 million state of the art building for The Roslin Institute, occupied in March 2011. The Roslin Institute's mission is to gain a fundamental understanding of genetic, cellular, organ and systems bioscience underpinning common mechanisms of animal development and pathology, and to drive this into prevention and treatment of important veterinary diseases and develop sustainable farm animal production systems.

The Roslin Institute holds a Silver Athena SWAN award in recognition of their commitment to advancing the representation of women in science, mathematics, engineering and technology.

The Roslin Institute is strategically supported by the BBSRC; funded by Institute Strategic Programme Grants and National Capability Grants. The Institute aims to enhance the lives of animals and humans through world-class research in animal biology. The principal objectives are to:

- Enhance animal health and welfare through knowledge of genetic factors affecting resistance to disease.
- Enhance sustainability and productivity of livestock systems and food supply chains through understanding of reproductive and developmental biology.
- Enhance food safety by understanding interactions between disease causing organisms and animals.
- Enhance human health through an understanding of basic mechanisms of health and disease and comparative biology of animal species.
- Identification of new and emerging zoonoses and understand how pathogens might cross from animals to humans.
- Enhance quality of life for animals by studying the mechanisms and behaviours associated with optimising their environment and life experiences.

The Roslin Institute provides holistic solutions to global challenges in human and veterinary medicine, the livestock industry and food security. The results of the Institute's research are important in many ways.

The Roslin Institute aims to improve animal health and welfare with a view to benefiting the environment, developing countries, farmers and the public. Their research goals are to conserve genetic diversity, control animal diseases, develop new diagnostics and therapeutics for animals and humans and improve food quality and safety. The increase in global demand for livestock products as the world's population increases and becomes more affluent means new methods of production that ensure long-term sustainability must be developed.

The research of The Roslin Institute involves work in animals, in cells and tissues, and in computer modelling and simulations. Research is conducted at the highest standards of animal care and welfare.

The Roslin Institute has a large number of collaborations within Edinburgh; both with the University and with other local research organisations and our scientists collaborate widely on the international stage.

Research Excellence Framework (REF) 2014

The Roslin Institute, along with the Royal (Dick) School of Veterinary Studies and Scotland's Rural College, were part of a joint submission to the 2014 Research Excellence Framework. This submission to Unit of Assessment 6 (Agriculture, Veterinary and Food Science) was ranked as number 1 in the UK. The joint submission was the largest to UoA6, with over three quarters of the research outputs submitted judged to be "world leading" or "internationally excellent". Over 80% of the submitted impact studies were scored highly, in addition to which the research environment was scored as 100% at 4*.

Equine Clinical Services

Equine Clinical Services comprises the Dick Vet Equine Hospital and Practice. The Dick Vet Equine Hospital has a well-balanced caseload of approximately 1400 referred consultations annually to the three dedicated departments of medicine, orthopaedics and soft tissue/dentistry, and has an international reputation for clinical and research work in equine dentistry. Referrals come from all over Scotland and the north of England although some come from much further afield. Increasingly, patients are referred for advanced diagnostic imaging and diagnosis is aided by ready access to clinical pathology facilities within our on-site Veterinary Pathology Unit. The Dick Vet Equine

Practice currently attends over 4500 equine cases annually, providing first opinion ambulatory services to local horse owners, mostly based in Midlothian, and parts of West and East Lothian. The practice has a team of 4 vets but is closely associated with the Equine Hospital, which is situated at the same location. DVEP provides both didactic and practical teaching for BVM&S students, who routinely accompany vets on calls during their final year. Furthermore, the Equine Service carries out the emergency veterinary duties at Musselburgh Racecourse. Equine clinical services support teaching and research through income generation and supply of clinical material; it has an annual turnover of around £1.25 million.

Description of Residency

The resident in Equine Dentistry will participate in the diagnosis and treatment of horses referred to the Equine Hospital of the R(D)SVS for dental and soft tissue investigations and surgery. This work will include communication with clients and referring colleagues and supervision of final year students allocated to cases, diagnostic imaging (scintigraphy, radiography, MRI, ultrasonography, CT, resting and overground endoscopy) and assisting with surgery. Experience of the other services within the clinic (Equine Orthopaedics, Internal Medicine and, where appropriate, Equine Practice) will also be gained.

The resident will be on an out-of-hours rota with the other equine residents and this will entail dealing with all types of cases including colics and wounds. Teaching experience will be gained through supervision of clinical students, provision of tutorials and a small number of lectures and practicals to post-graduate students studying equine science and colleagues on CPD courses. The resident will enrol for the European Veterinary Dental College (Equine) Diploma - see EVDC Training Document for full details (http://176.32.230.22/evdc.info/?page_id=87). Limited externships to other centres of excellence in equine dentistry, including small animal dentistry will be expected.

Further Information

The 48 month full-time residency is a clinical-based programme aimed at obtaining specialised knowledge and experience and is based at the Easter Bush Campus.

While undertaking the Scholarship programme, your status will be that of post-graduate student. You will be required to enroll as a full-time non-graduating postgraduate student for up to a maximum of 48 months. During this period of registration you will undertake supervised studies leading to a professional Diploma. Subject to approval you may be eligible to register for the degree of MSc by Research or another postgraduate degree; the appropriate registration will be discussed with your supervisor. The School will make available the applicable fees at EU rate.

A principal aim of the Clinical Scholarship programme is to train research-literate clinicians. You must therefore complete a clinical research project and the nature of this project will be agreed with your Supervisor at the start of your Residency. You will be expected to prepare and submit manuscripts for publication in refereed journals during your training programme; the number, nature and timing of these manuscripts will be agreed with your Supervisor.

Your programme of study and work will be set by your supervisor in conjunction with other appropriate staff. In addition to instruction and research, your training will include both teaching and clinical duties. Duties may change from time to time following appropriate consultation with your supervisor.

Both didactic and informal group teaching of undergraduates and, possibly, postgraduates will be required. This will normally be in clinical subjects related to your discipline but may involve veterinary pre-clinical (e.g. anatomy) teaching if this is considered valuable to your academic development.

You will be required to undertake clinical duties (including out of hours duties) necessary to gain the appropriate training. While undertaking clinical duties, you must adhere to any procedures, protocols, rules or regulations determined by the Deputy Head of School for Clinical Services. The requirement to undertake such duties does not confer employee status.

An important aspect of your training will be to accept appropriate professional responsibility for clinical case supervision and to undertake such investigation, therapeutic measures and surgical procedures as necessary under the supervision of your supervisor. It is expected that the degree of responsibility will increase as you progress through the programme. Ultimate responsibility for individual cases will always be with your supervisor.

Outside professional activities or employment must be discussed and approved by the Head of Section and must not interfere with Scholarship duties.

Scholars are required to obtain the consent of the Head of Section before becoming a member of any outside committee or expressing views in public on matters connected with the work of the School. (This does not preclude addressing scientific or professional gatherings). If a Scholar should feel aggrieved at a refusal of consent, there is a right of appeal to the Head of School. Copies of the current procedures for dealing with matters of discipline or grievance are available from the School.

Scholars may be required to participate in School events as directed by the Head of Section.

Communications to the press, radio or television, excluding scientific communications to the scientific and veterinary press, expressing personal views may not be communicated from the School address except by permission of the Head of School.

Clinical Training Scholars, by accepting the Scholarship, assign all Intellectual Property that they may generate in the course of their studies to The University of Edinburgh.

Further specific conditions relate to some externally funded scholarships and to Residencies in specific disciplines; such conditions will form part of your "contract" with the University.

Stipend, Allowances and Leave

The post attracts an annual tax-free stipend of £18,750 per annum, paid in monthly instalments by direct transfer to your Bank or Building Society account, normally on the 28th of the month.

The Scholarship is for 48 months, subject to review on an annual basis. In the event that the Scholarship is not completed or satisfactory progress not made, a period of 2 months' notice in advance of the date of departure must be given by either party.

You must be registered as a Member of the Royal College of Veterinary Surgeons. You are responsible for ensuring that you are registered and for paying the annual registration fee.

Your annual leave (absence from the study programme) entitlement is 25 days plus the four recognised University holiday days. All leave must be agreed at least 30 days in advance with your

supervisor (or a staff member to whom this responsibility has been delegated). Where clinical or other duties fall on a recognised holiday day, you will be granted time off in lieu. The leave year will run from January to December. In part years (i.e. at the start and end of your programme), leave entitlement will be on a pro rata basis. Annual leave cannot be carried from one leave year to another, except in exceptional and approved circumstances.

During sickness absence covered by medical certificates, payment of the award will continue at the full rate for three calendar months. Any payment beyond this period will be at the discretion of the School.

The University's Student Maternity and Family Leave Policy will apply to Clinical Scholars.

http://www.docs.sasg.ed.ac.uk/academicservices/policies/student_maternity_and_family_leave_policy.pdf

Where eligible, Clinical Scholars will be entitled to receive stipend payments for up to 6 months maternity leave or two weeks paid paternity leave as applicable. Clinical Scholars can request an additional 6 months interruption of studies as maternity leave although stipend payment is not available for maternity leave in excess of 6 months.

The Scholarship programme will include 5 days per annum for attending such meetings, seminars, tutorials and lectures and preparing written reports as approved by your supervisor. Additional Continuing Professional Development (CPD) opportunities may arise during the course of your scholarship if deemed necessary and approved by your supervisor. A specific allowance (currently £600 per annum) is available to cover or contribute to the cost of CPD, travel, conferences, AV production, photocopying and library requests. This information is available on request from the Head of Section.

Disclosure

This scholarship is subject to Standard Disclosure Check. Appointment to this scholarship is conditional on the University receiving a satisfactory Standard Disclosure check. The successful candidate will not be permitted to commence until this has been received. Information provided will be kept confidential and individuals will not be discriminated against unnecessarily due to non-relevant offending background. If you require further information regarding Disclosure, please refer to: www.disclosurescotland.co.uk

English Language Requirements

If English is not your first language, you must also provide evidence of good written and spoken English skills. Please go to www.ed.ac.uk/studying/postgraduate/international/language for further details.

Informal Enquiries and Visits

Informal enquiries are encouraged and may be made to: Prof. Paddy Dixon, telephone 0131 650 6253 or by email P.M.Dixon@ed.ac.uk

Application Procedure

A completed application form, covering letter, Curriculum Vitae and the names of three referees should be submitted, preferably electronically, to Mrs Emma Pineau (VetClinicalScholars@ed.ac.uk) or alternatively, they may be posted to Mrs Emma Pineau, Royal (Dick) School of Veterinary Studies, The University of Edinburgh, Easter Bush Campus, Roslin, EH25 9RG, Scotland, telephone: +44 (0)131 651 9198, from whom further particulars may be obtained.

Closing Date for Applications

The closing date for applications for this scholarship is **7th February 2016**.

We cannot consider late applications.
